PROFILE

Motivated Computer Engineering undergraduate at University of Ruhuna (expected graduation August 2026), passionate about AI/ML and full stack software development. Completed a six month internship at Sri Lanka Telecom PLC (SLT) as an AI Engineer Trainee. Skilled in UI/UX development and full stack development with hands on experience in building efficient and user friendly applications. I thrive in both independent and team environments. With a strong analytical mindset and expertise in multiple technologies, I am eager to take on a challenging role to drive innovation and efficiency.

TECHNICAL SKILLS

Programming : JavaScript, C#, C++, Python, AI/ML

Web Development : Next.js, React.js, Node.js, HTML5, CSS3, Tailwind CSS ,UI/UX

Software Development: Full Stack Development, Frontend and Backend Development,

Tools& Technologies : Git, Docker, MongoDB, MySQL, Jira, GitHub Actions, Apache,
MLOPs

Other : Project Management, Debugging, Documentation Skills, Volunteering

EDUCATION

Bachelor of Science (Hons) in Computer Engineering (Undergraduate)

University of Ruhuna, Sri Lanka

Feb 2022 - Aug 2026 (Expected)

General Certificate of Education Advanced Level

Southlands College Galle, Sri Lanka

October-2020

Z-Score : 1.8996

AI Engineer Trainee — Sri Lanka Telecom PLC (SLT)

Internship

May 2025 -Nov 2025

PROJECTS

Final Year Project — RL Based Hospital Bed Allocation and Queue Management System

University of Ruhuna, Sri Lanka

2025-2026 (Ongoing)

- Designing a RL based models (DDQN, MARL, PPO) for real time patient queue prioritization and bed allocation at Karapitiya Teaching Hospital, integrated into a Next.js hospital management system.
- Setting up a full CI/CD workflow using GitHub Actions for automated model retraining and deployment.

Tomato Food Delivery Application Using MERN Stack with Stripe

University of Ruhuna, Sri Lanka

2025

- Developed a full stack web application, enabling user authentication, order placement with secure payment(stripe) and shopping cart functionality.Implemented the admin panel features to enable order tracking and product management.
- GitHub URL: <https://github.com/Kaveesha20/Food-Delivery.git>

NewsLens — NLP News Summarization & Semantic Search Platform (Team Project)

University of Ruhuna, Sri Lanka

2025

- Built and evaluated multiple summarization approaches (T5-small fine-tuning, extractive baseline, prompt engineering with zero-shot/few-shot/chain-of-thought) benchmarked using ROUGE metrics.Implemented Word2Vec-based semantic search for related news retrieval .
- GitHub URL: <https://github.com/Neshadi/Automated-News-Summarization.git>

Hand Gesture Mouse Controller (Team Project)

University of Ruhuna, Sri Lanka

2025

- Built a webcam based hand gesture mouse control system using MediaPipe and a PyTorch gesture classification model (GestureNet), supporting 7 distinct gestures.Developed a web based control interface with real time mode switching and WebSocket communication.
- GitHub URL: <https://github.com/Kaveesha20/gesture-mouse.git>

Secure Anonymous Drop (Team Project)

University of Ruhuna, Sri Lanka

2025

- Developed a secure, anonymous file transfer application using AES-256-GCM and RSA-4096 encryption for end-to-end secure file sharing.
- GitHub URL: <https://github.com/Neshadi/secure-file-drop.git>

MapReduce Retail Analysis (Team Project)

University of Ruhuna, Sri Lanka

2025

- Implemented a MapReduce based data pipeline to analyze large scale retail transaction data for sales patterns and insights.
- GitHub URL: <https://github.com/Kaveesha20/mapreduce-retail-analysis.git>

EXTRA CURRICULAR

- Trainee under Leadership Camp Organized by Career Guidance Unit, University of Ruhuna in 2022
- Volunteered in a social project at Teaching Hospital, Karapitiya, Galle Career Guidance Unit in 2022.
- Member of Institute of Engineers, Sri Lanka (IESL)
